5.1.General methodological presentation

The content of the course will be developed through expository classes. The students will have additional references for each issue in the moodle platform.

The students will be encouraged to search information through complementary references (papers, manuals, etc.) in order to increase their knowledge, and the professor will recommend to all students the use of the library and the Internet when they will work in different case studies.

In the practice lessons, the professor will present videos, documentaries or audio tapes to enhance the students' reflection. Students will work with short case studies in paper format in the beginning of the course in order to find the processes altered and the specific disturbances. As developments progress in the practice the case studies will be longer and with the highest number of processes altered.
