

29719 - Mechanism and Machine Theory

Información del Plan Docente

Academic Year	2017/18
Faculty / School	110 - Escuela de Ingeniería y Arquitectura
Degree	434 - Bachelor's Degree in Mechanical Engineering
ECTS	6.0
Year	2
Semester	Second semester
Subject Type	Compulsory
Module	---

1.General information

1.1.Introduction

1.2.Recommendations to take this course

1.3.Context and importance of this course in the degree

1.4.Activities and key dates

2.Learning goals

2.1.Learning goals

2.2.Importance of learning goals

3.Aims of the course and competences

3.1.Aims of the course

3.2.Competences

4.Assessment (1st and 2nd call)

4.1.Assessment tasks (description of tasks, marking system and assessment criteria)

5.Methodology, learning tasks, syllabus and resources

5.1.Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. It is based on participation and the active role of the student favors the development of communication and decision-making skills. A wide range of teaching and learning tasks are implemented, such as lectures, guided assignments, laboratory sessions, autonomous work, and tutorials.

Students are expected to participate actively in the class throughout the semester.

29719 - Mechanism and Machine Theory

Further information regarding the course will be provided on the first day of class.

5.2.Learning tasks

The course includes 6 ECTS organized according to:

- Lectures (1.8 ECTS): 45 hours.
- Laboratory sessions (0.6 ECTS): 15 hours.
- Guided assignments (0.4 ECTS): 10 hours.
- Autonomous work (3.0 ECTS): 75 hours.
- Tutorials (0.2 ECTS): 5 hours.

Lectures: the professor will explain the theoretical contents of the course and solve illustrative applied problems. These problems and exercises can be found in the problem set provided at the beginning of the semester. Lectures run for 3 weekly hours. Although it is not a mandatory activity, regular attendance is highly recommended.

Laboratory sessions: sessions will take place every 2 weeks (5 sessions in total) and last 3.0 hours each. Students will work together in groups actively doing tasks such as practical demonstrations, measurements, calculations, and the use of graphical and analytical methods.

Guided assignments: students will complete assignments, problems and exercises related to concepts seen in laboratory sessions and lectures. They will be submitted at the beginning of every laboratory sessions to be discussed and analyzed. If assignments are submitted later, students will not be able to take the assessment test.

Autonomous work: students are expected to spend about 75 hours to study theory, solve problems, prepare lab sessions, and take exams.

Tutorials: the professor's office hours will be posted on the degree website to assist students with questions and doubts. It is beneficial for the student to come with clear and specific questions.

5.3.Syllabus

1. Introduction to the synthesis of mechanisms
2. Methods of kinematic analysis of mechanisms
3. Methods of dynamic analysis of mechanisms
4. Analysis and design of mechanisms of special interest: mechanisms of cam-follower y mechanisms of gears trains
5. Study cycling machines: regulation

5.4.Course planning and calendar

For further details concerning the timetable, classroom and further information regarding this course please refer to the "Escuela de Ingeniería y Arquitectura " website (<https://eina.unizar.es/>)

5.5. Bibliography and recommended resources

[BB: Basic Bibliography / BC: Additional Bibliography]

- [BB] 1. Mabie, Hamilton H.. Mecanismos y dinámica de maquinaria / Hamilton H. Mabie, Fred W. Ocvirk . 2a. ed., 2a reimpr. Mexico [etc.] : Limusa, cop. 2000
- [BB] 2. Shigley, Joseph Edward. Teoría de máquinas y mecanismos / Joseph Edward Shigley, John Joseph Uicker . México [etc.] : McGraw-Hill, cop. 1988 (imp. 1995)
- [BB] 3. Norton, Robert L. : Diseño de maquinaria : síntesis y análisis de máquinas y mecanismos / Robert L. Norton ; revisión técnica, Miguel Ángel Ríos Sánchez, Cuitláhuac Osornio Correa, Mario Acevedo Alvarado . - 5ª ed. México [etc.] : McGraw-Hill, cop. 2013
- [BC] 4. Nieto Nieto, Justo. Síntesis de mecanismos / Justo Nieto Nieto . Madrid : AC, D.L.1978
