

68908 - Speciality in Safety in the workplace

Información del Plan Docente

Academic Year	2017/18
Faculty / School	102 - Facultad de Derecho
Degree	462 - Master's in Occupational Health and Safety
ECTS	10.0
Year	1
Semester	Second semester
Subject Type	Optional
Module	---

1.General information

1.1.Introduction

1.2.Recommendations to take this course

1.3.Context and importance of this course in the degree

1.4.Activities and key dates

2.Learning goals

2.1.Learning goals

2.2.Importance of learning goals

3.Aims of the course and competences

3.1.Aims of the course

3.2.Competences

4.Assessment (1st and 2nd call)

4.1.Assessment tasks (description of tasks, marking system and assessment criteria)

5.Methodology, learning tasks, syllabus and resources

5.1.Methodological overview

The teaching methodology is developed through lectures, seminars, practical exercises, self-assessment and visits to industrial facilities.

5.2.Learning tasks

68908 - Speciality in Safety in the workplace

The course consists of 10 ECTS credits distributed as follows:

- Type 1. Lectures (1.6 ECTS): 40 hours. 16% workload.
- Type 2. Problems and Cases (1.8 ECTS): 45 hours. 18% workload.
- Type 4. Field practices (visits) (0.6 ECTS): 15 hours. 6% workload.
- Type 6. Guided assignment (0.8 ECTS): 20 hours. 8% workload.
- Type 7. Student autonomous work (5.0 ECTS): 125 hours. 50% workload.
- Type 8. Test (0.2 ECTS): 5 hours. 2% workload.

5.3.Syllabus

The program that the student is offered to help you achieve the expected results includes the following activities:

- Conferences. Presentation of the course contents through lectures illustrated with examples.
- Self-assessment exercises and learning. In each of the topics, the teachers prepare a series of questions, specific and short development or with a test-format. Their aim is for students to internalize the basic contents of the course.
- Case studies. Case studies to practice solving the problems posed by the management of risks related to safety at work, from detection risk through its evaluation to end in the elimination or control risk.
- Seminars. Several seminars that deal with some specific monographically proposed issues.
- Visits to industrial facilities. They try to give a real picture of the risks and preventive measures implemented in a working environment.

5.4.Course planning and calendar

Further information concerning the timetable, classroom, assessment dates and other details regarding this course, will be provided on the first day of class or please refer to http://derecho.unizar.es/v_calidad/master_rrll.html

5.5.Bibliography and recommended resources

No bibliographic records for this course.
