

60571 - Agri-food business management

Información del Plan Docente

Academic Year	2018/19
Subject	60571 - Agri-food business management
Faculty / School	201 - Escuela Politécnica Superior
Degree	546 - Master in Agricultural Engineering
ECTS	6.0
Year	2
Semester	First semester
Subject Type	Compulsory
Module	---

1.General information

1.1.Aims of the course

The subject and its expected results meet the following approaches and objectives:

The agri-food sector has become one of the pillars of development and sustainability of large geographic areas that survive away from population centers. The sector has the important challenge of providing an income level to its inhabitants and few development opportunities to halt the eternal exodus and depopulation, breaking centric development models have emerged since the mid-twentieth century. That is why all agricultural activity must carry contemplated understanding of what factors allow arise, remain and progress to businesses that live in this environment are. The course aims to explain the markets that its products face, development, factors of competitiveness to achieve the objectives, supported by the development and understanding of logistics and value chain activity, and prepare to analyze the ability to generate results and financing activity.

1.2.Context and importance of this course in the degree

Organization and Business Administration Agrifood is a subject that becomes a basic and complementary tool to the body of knowledge and subjects taught in the Master. The vast majority of business activities carried out through the use of natural resources should be complemented by a knowledge management mechanisms available to companies competing in markets to which these goods and products are targeted. It is therefore necessary to identify key elements, levers that allow the success of business organizations and the basic tools of research, development and management of resources and capabilities that differentiate them and must allow setting goals, are studying its viability and profitability.

1.3.Recommendations to take this course

The subject of Organization and Management of Agro-food Enterprises is a core subject, have not been defined prior to its development requirements, is a necessary immersion in the business management tools. 3. Assessment (1st and 2nd call)

3.1. Assessment tasks (description of tasks, marking system and assessment criteria)

The student must demonstrate that it has achieved the intended learning outcomes through the following evaluation activities

In the first call, there are two systems of evaluation:

1.1

Continuous Assessment: In this case, throughout the semester one written test that assess learning achieved by the student on the theoretical and practical content of the subject will be made, and practices T1 will be delivered and T2. Each of these activities will be a percentage of the total marks to achieve as follows:

Assessment: Consistent in a written statement on the issues of the subject test. It accounts for 50% of the mark to reach (5 points). It will be held in the end of December.

The type of test questions may be theoretical, practical and theoretical and practical. Similarly, the tests may include short or developmental responses, but always related to actual cases or situations.

Coursework 1 (T1): Consists on delivering a paper on one or more of the topics covered in class. The achieved results will be presented in written and oral form and discussed in class. This work will be done individually and accounts for 20% of the grade (2 points).

Coursework 2 (T2): Consists on delivery by students of some of the following activities: reading comments, news, conducting exercises and case studies. These will be made, debated and discussed in class. Each of these activities will be held during class and classrooms assigned to the group. These tests execution tasks will be performed individually or in groups (depending on their nature) and account for 30% of the grade (3 points).

In all tests must be obtained at least 3 points (out of 10) to add the score to the rest of assessable activities.

1.2

Global assessment: Students who do not opt for continuous assessment, not exceeding the subject through continuous assessment or want to improve your score, is entitled to present to the overall assessment consisting of a written test to be held on the dates indicated in the calendar approved by the center and the completion of a work of T1 type presented above. Specific:

Written test: Consisting written on all subjects of the test subject. It accounts for 80% of the note to reach (8 points). Of these 8 points, 5 will focus on the theoretical and practical content seen on the subject (through short and / or development related to actual cases or situations responses), and the remaining 3 points consist of questions related to readings, exercises and consisting relate theory to practical situations or cases real cases. This test will take place on the dates indicated in the calendar approved by the center where the subject is taught.

Coursework 1 (T1): Consist delivering a paper on one or more of the topics covered in class. The achieved results will be presented in written and oral form after the completion of the corresponding global assessment written test. This work will be done individually and accounts for 20% of the grade. You need not have this job if the student already submitted as part of the ongoing evaluation and scored above 3 rating (out of 10).

Students who through continuous evaluation have reached 50% of the grade, are not required to attend the global test. However, on first call and if the student use the two evaluation systems prevail better test scores.

The second call evaluation will be conducted exclusively through a global assessment as that described above. Again, it is not necessary to work the type T1 if the student already presented in any of the systems of evaluation of the first call and scored above 3 rating (out of 10).

Evaluation criteria

Evaluation criteria

Written test: the adequacy of responses to questions and justifications made by the student will be assessed. Therefore, to get the highest score on each question, not only must give the right answer but also it must be properly justified and related to the information provided in the statements.

Coursework 1 (T1): the difficulty of the subject matter will be assessed, the sources of information, quality of content, the degree of depth research on the topic, structure and consistency, the written presentation (grammar and spelling, etc.) and its oral defense (communication and expository skills). 80% of the note of the work will be based on the written report and 20% in its oral presentation. The work should follow the following structure:

• Introduction: Where the choice of the company is justified, briefly describe it, work objectives arise and the

60571 - Agri-food business management

contents thereof are indicated.

• Development: Where the aspect or aspects of the management and organization of the company chosen is analyzed.

• Conclusions: Where summarizing main results and recommendations for the company are exposed.

Coursework 2 (T2): the implementation of the theoretical views on the subject will be assessed by reference whenever possible to the information included in the case studies, and participation in class discussions for resolution.

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. A wide range of teaching and learning tasks are implemented, such as lectures, cooperative work, problem solving and case studies, as well as discussion and reflection of texts and readings.

4.2. Learning tasks

The course includes the following learning tasks:

- Lectures provide the necessary theoretical knowledge, accompanied by practical examples to facilitate the understanding and application of the concepts studied. These sessions will address the following contents:
 1. Introduction to the management of food companies
 2. Introduction to the food sector differences and their involvement in the primary, secondary and tertiary
 3. Competitive positioning of the company, levers, resources and capabilities
 4. The value chain, supply chain and logistics sector
 5. Financial analysis and estimation of results
 6. Organizational decisions
- Solving and presentation of problems and case studies, preparation and presentation of papers, discussion topics, reading commentaries and interactive activities, which are conducted both inside and outside the classroom, individually or in groups.
- In tutorials the teacher may supervise the work done by the students, answer questions about the theoretical and practical contents of the course and / or the preparation of exercises applied to the theoretical content.
- Autonomous work includes the study of theoretical and practical content, solving of practical activities, conducting individual and / or group seeking and analyzing information, among others.
- Assessment activities.

4.3. Syllabus

The course will address the following topics:

TOPIC 1 THE COMPANY STRUCTURE, SYSTEM OBJECTIVES, RESPONSIBILITIES AND PARTICIPANTS

TOPIC 2 AGRO-FOOD SYSTEM

TOPIC 3 COMPETITIVE ANALYSIS

TOPIC 4 SUPPLY CHAIN AND VALUE CHAIN. OPERATIONS AND COSTS. DECISIONS OF PRODUCTION AND INVENTORIES

TOPIC 5 ASSESSMENT OF PROFITABILITY OF ACTIVITIES AND PROJECTS

TOPIC 6 ORGANIZATIONAL DESIGNS, ADDRESS AND DECISION MAKING IN ENVIRONMENTS OF UNCERTAINTY

4.4. Course planning and calendar
