

27438 - Globalisation, Development and History

Syllabus Information

Academic Year: 2020/21

Subject: 27438 - Globalisation, Development and History

Faculty / School: 109 - Facultad de Economía y Empresa

Degree: 417 - Degree in Economics

ECTS: 5.0

Year: 4

Semester: First semester

Subject Type: Optional

Module: ---

1.General information

1.1.Aims of the course

Globalization, Development and History is aimed at understanding the integration and disintegration processes in three main markets?goods and services, labour, and capital? throughout history, in particular from the early nineteenth century onwards.

1.2.Context and importance of this course in the degree

The final goal of this course is to use history to better understand the present.

1.3.Recommendations to take this course

1. Be able to read English.
2. Have some knowledge of econometrics.
3. Be able to read, tables, figures, etc.
4. Knowledge of theories and techniques of International Economics is recommended.
5. Class participation is also recommended.

2.Learning goals

2.1.Competences

2.2.Learning goals

1. Understanding the meaning of globalization.
2. Knowledge of the relationships between globalization and economic growth throughout history, in particular from the early nineteenth century onwards.
3. Be able to distinguish between more and less globalized periods.
4. Empirical knowledge of the causes and effects of globalization.
5. Empirical knowledge of processes of integration in three markets?goods and services, labour, and capital?and relationships between them.
6. Be able to use the knowledge of the history of globalization to better understand the current globalization wave.
7. Think in terms of economic policy.
8. Be able to read scientific literature (books and articles in specialized journals).

2.3.Importance of learning goals

This course aims to contribute to the better understanding of the current globalization wave that students will face. Learning from the past may help.

3. Assessment (1st and 2nd call)

3.1. Assessment tasks (description of tasks, marking system and assessment criteria)

This course is made up of two parts: theoretical and practical.

The theoretical part is provided by the teacher through lectures. In the practical part, the students discuss particular issues.

Each part makes up 50% of the final mark.

At the end of the semester, students have to take the final written exam. To pass this course students have to pass both parts, theoretical and practical (i.e. obtain at least 2.5 points in each part).

The final exam represents 80% of the final mark. The final exam consists of one or two questions on both the theoretical and practical parts. The exam lasts about one hour or one hour and a half, and only about one sheet of paper can be used. Students not only need to demonstrate their acquired knowledge and their ability to reason in economic terms, but also their writing skills.

A mandatory presentation represents the remaining 20% of the final mark. Usually in pairs, students need to present a scientific article (assigned by the teacher) in one of the practical classes (the date is also assigned by the teacher). Just before the presentation, students need to deliver a (hard-copy) 1,000 word analysis of the article. The aim of the presentation is to assess students' synthesis capacity, clarity, critical reasoning, and the ability to answer questions from the audience. Students should meet with the teacher at least one week before the presentation to receive advice. (The grades obtained through the presentation stays valid for the second exam date)

These tests are expected to be carried out in person but if the health circumstances require :

In the case of online assessment, it is important to highlight that, in any test, the student

https://protecciondatos.unizar.es/sites/protecciondatos.unizar.es/files/users/lopd/gdocencia_1

The necessary software will be used to check the originality of the activities carried out. The detection of plagiarism or copying in an activity will imply the rating of 0 points in it.

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

This course is made up of two parts: theoretical and practical.

4.2. Learning tasks

The theoretical part is an overview of globalization, provided by the teacher through lectures?two hours per week during September, October and November; one hour per week during December and January. Lectures are based on books and scientific papers from specialized journals (plus further material provided by the teacher).

In the practical part, the students (usually in pairs) discuss and present scientific papers or book chapters that delve into specific issues introduced in the theoretical part?two hours per week during September, October and November; one hour per week during December and January. This is a compulsory requirement to pass the course.

The teaching methodology is planned to be face-to-face. However, if necessary for health reasons, the face-to-face classes may be taught online.

4.3. Syllabus

1. Introduction to globalization

1.1 What is globalization? When did it begin?

1.2 Main causes

1.3 Main effects

1.4 Further effects

2. Goods and services market: circa 1815-1913, 1913-1945, and from 1945 onwards

2.1 Background of globalization

2.2 Increasing commerce and changing patterns: circa 1815-1913

2.2.1 Origin and destination countries. Type of products

- 2.2.2 Causes and effects
- 2.3 Disintegration of international markets: 1913-1945
 - 2.3.1 The effect of WWI
 - 2.3.2 The effect of the Great Depression
- 2.4 The effect of WWII
- 2.5 New causes of increasing commerce from 1945 onwards
- 2.6 Trade policies and divergent results: 1945-1980
- 2.7 Fast re-integration of markets from 1980 onwards
- 2.8 New features and effects of commerce from 1980 onwards
- 3. International migration: circa 1820-1913, 1913-1945, and from 1945 onwards
 - 3.1 Changes in migration patterns
 - 3.2 The increase in international migration: circa 1820-1913.
 - 3.2.1 Origin and destination countries
 - 3.2.2. Causes and effects of migrations on origin and destination countries, and immigrants
 - 3.3 The end of the Atlantic labour market, and Asian migrations, 1913-1945
 - 3.3.1 The end of the Atlantic labour market; intra-European migrations
 - 3.3.2 Asian migrations
 - 3.4 The resurgence of mass migration from 1945 onwards; changes in origin and destination countries
 - 3.5 Principal current migration systems
 - 3.6 Causes and effects of migrations on origin and destination countries, and immigrants
 - 3.7 Current migration policies
 - 3.8 New features of international migrations. Perspectives
- 4. Capital markets circa 1830-1931, 1931-1945, 1945-1971, and from 1971 onwards
 - 4.1 Background of modern capital markets
 - 4.2 The emergence of the world capital market in the early nineteenth century
 - 4.3 The macroeconomic trilemma. Exchange rate regimes
 - 4.4 Increased capital exchanges before 1914
 - 4.4.1 The Gold Standard
 - 4.4.2 Origin and destination countries. Market integration
 - 4.4.3 Causes and effects of capital movements on origin and destination countries
 - 4.5 Changes and problems in the inter-war period.
 - 4.6. The slow resurgence of capital markets in the Bretton Woods period
 - 4.7. The acceleration of capital market integration from 1971 onwards
 - 4.8. Features of the new global capital market
- 5. Complement and substitute relations between factor and product markets
 - 5.1. Relations between commerce, migration and capital

4.4.Course planning and calendar

sCHEDULE

(Subject to unexpected changes)

Week 1

Introduction to GDH. Job assignment in the practical part

Weeks 1, 2 and 3

Unit 1. Introduction to globalization

Practical part. Compulsory readings:

1. Rodrik, D. (2011): *The Globalization Paradox. Democracy and the Future of the World Economy*. New York: Norton & Company, pp. 184-206 [chapter 9, The Political Trilemma of the World Economy].
2. Neumayer, E. and De Soysa, I. (2005): 'Trade openness, foreign direct investment and child labor?'. *World*

Development 33 (1): 43-63.

3. Kabeer, N. (2004): 'Globalization, labor standards, and women's rights: dilemmas of collective (in)action in an interdependent world?'. *Feminist Economics* 10 (1): 3-35.

Weeks 4, 5 and 6

Unit 2. Goods and services market

Practical part. Compulsory readings:

4. Bohlin, J. (2010): 'The income distributional consequences of agrarian tariffs in Sweden on the eve of World War I?'. *European Review of Economic History* 14 (1): 1-45.

5. Autor, D. H., Dorn, D. and Hanson, G. H. (2016): 'The China Shock: Learning from Labor Market Adjustment to Large Changes in Trade?'. *Annual Review of Economics* 8.

Weeks 7, 8 and 9

Unit 3. International migration

Practical part. Compulsory readings:

6. Hatton, T. J. and J. G. Williamson (1998): *The Age of Mass Migration. Causes and Economic Impact*. New York and Oxford: Oxford University Press, pp. 154-177 [Chapter 8, Absorbing the Immigrant: The Impact on Americans].

7. Nickell, S. and J. Saleheen (2015): The impact of immigration on occupational wages: evidence from Britain. Bank of England Staff Working Paper No. 574.

Weeks 10, 11 y 12

Unit 4. Capital markets

Practical part. Compulsory readings:

8. Clemens, M. and Williamson, J. G. (2000): Where did British foreign capital go? Policies, fundamentals and the Lucas paradox, 1870-1913. NBER WP 8020.

9. Papaioannou, E. (2009): 'What drives international financial flows? Politics, institutions and other determinants?'. *Journal of Development Economics* 88: 269-281.

Weeks 13 and 14

Unit 5. Relations between factor and product markets

Practical part. Compulsory readings:

10. Parsons, C.R. (2012): Do Migrants Really Foster Trade? The Trade-Migration Nexus, a Panel Approach 1960-2000. World Bank Policy Research Working Paper 6034.
