Academic Year: 2020/21

Subject: 29341 - Undergraduate Dissertation

Faculty / School: 229 - Facultad de Ciencias de la Salud y del Deporte

Degree: 442 - Degree in Odontology

ECTS: 6.0

Year: 5

Semester: Second semester

Subject Type: ---

Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The Undergraduate Dissertation consists of the defense of two cases pertaining to the clinical practice portfolio compiled during the course.

The work will materialize in a written description of two cases chosen by the student among those included in the portfolio of clinical practice and will be presented orally. In it, the student must demonstrate the ability to transmit the acquired knowledge and answer questions made by the committee.

The establishment of a proper diagnosis and treatment plan, presentation, clarity and understanding of writing, diversity and selection criteria of the information provided, the balance between information provided from external sources, organization and integration, the selection of complementary and optional activities, contributions of content, ideas or own suggestions will be evaluated.

In this process, the director / s will accompany and guide the student but the completion of the Final Degree Project involves fundamentally the autonomous work since it will be this one that will have to demonstrate a continuous ability to take creative and critical initiatives, to manage information and to express their knowledge in an appropriate way, always applying disciplinary integration, planning and organization of work.

4.2.Learning tasks

This course is organized as follows:

- **AUTONOMOUS WORK** of the student under the direction of the corresponding teacher/s.
- **Tutorials:** The director / s will guide the student and resolve any doubts that may arise during the preparation from work. Attendance to tutorials is recommended to support the development of the work and it is remembered that these form part of the assessment tests of the subject. Given the exceptional nature of the academic year 2020/21, they will be carried out, preferably, telematically connected student and director / s to through technologies that allow interaction (Google Meet type).

4.3.Syllabus

This is a transversal course that does not have own content and whose work will be done in association with different courses.

4.4.Course planning and calendar

The schedule, the planned activities and the necessary documentation for the assignment of director / s, election thematic, preparation of the project and defense will be in accordance with the Regulations for Final Degree Projects of the Faculty of Health Sciences and Sport.
