It should be noted that in any online assessment task the student performance may be recorded, following the regulations described in: [?https://protecciondatos.unizar.es/sites/protecciondatos.unizar.es/files/users/lopd/gdocencia\\_reducida.pdf?\\_](https://protecciondatos.unizar.es/sites/protecciondatos.unizar.es/files/users/lopd/gdocencia_reducida.pdf?_)

## 4.Methodology, learning tasks, syllabus and resources

### 4.1.Methodological overview

The learning process of this course is based on theory and practice sessions; the reading, study and discussion of the recommended bibliography; individual and group work in presentations and discussions in class; individual or group tutorials; and autonomous learning and study of the course contents.

All lectures and seminars will be imparted on site. In the case of a new health emergency caused by the current pandemic all teaching will be moved online.

### 4.2.Learning tasks

The course includes the following learning tasks:

- Theory and practice sessions (30 hours): Presentation of topics, bibliographical orientation and proposal of questions and homework by the teacher, solving of questions and class discussion.
- Autonomous work (45 hours): Personal work of the students, individually and in groups, for solving questions, preparation of papers, reading reviews, and exam preparation.
- Individual or group tutorials (included in autonomous work of students).
- Exams.

### **4.3.Syllabus**

The course will address the following topics:

- Topic 1. The economy and the environment.
- Topic 2. The economics of pollution.
- Topic 3. The economic value of environmental services.
- Topic 4. The methods for valuing environmental benefits and costs.
- Topic 5. The Cost-Benefit Analysis of projects and policies.
- Topic 6. Discounting the future.
- Topic 7. The renewable and non-renewable natural resources.
