

Academic Year/course: 2021/22

66428 - Hydraulic and Wind Power Stations

Syllabus Information

Academic Year: 2021/22

Subject: 66428 - Centrales hidráulicas y eólicas

Faculty / School: 110 - Escuela de Ingeniería y Arquitectura

Degree: 536 - Master's in Mechanical Engineering

ECTS: 4.5

Year: 1

Semester: Second semester

Subject Type: Optional

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. A wide range of teaching and learning tasks are implemented, such as

- Lectures, where the basic principles of the theory will be given.
- Practice sessions, where the theory will be applied to problems.
- Mini-projects, where the students, either individually or in groups, will apply the acquired knowledge to real engineering cases.
- Tutorials.

4.2. Learning tasks

The course includes the following learning tasks:

- Lectures,
- Seminars,
- Practice sessions of the theory and
- Various mini-projects based on the course contents.

4.3. Syllabus

The course will address the following topics:

Section I. Hydraulic power stations

- a. Hydrology.
- b. Hydraulic resources. Power production.

- c. Hydraulic conduits of the power station.
- d. Operation of water turbines and auxiliary equipment.

Section 2: Wind power stations

- a. Introduction.
- b. Characterization of the wind resource.
- c. The wind turbine and electric generator.
- d. Equipment for wind farms.

4.4. Course planning and calendar

Further information concerning the timetable, classroom, office hours, assessment dates and other details regarding this course, will be provided on the first day of class or please refer to the EINA website.
