

60572 - Internships

Syllabus Information

Academic year: 2023/24

Subject: 60572 - Internships

Faculty / School: 201 - Escuela Politécnica Superior

Degree: 546 - Master in Agricultural Engineering

ECTS: 6.0

Year: 2

Semester: First semester

Subject type: External Placements

Module:

1. General information

The external academic internships constitute an activity of a formative nature carried out by the student and supervised by the university, whose objective is to allow them to apply and complement the knowledge acquired in their academic training, favouring the acquisition of competencies that prepare them for the exercise of professional activities, facilitate their employability and foster their capacity for entrepreneurship.

These approaches and objectives are aligned with the Sustainable Development Goals (SDGs) of the United Nations 2030 Agenda (<https://www.un.org/sustainabledevelopment/es/>), specifically, the learning activities planned in this subject will contribute to the achievement of Goal 4: Quality Education.

2. Learning results

- To be able to apply the theoretical knowledge acquired, putting it into practice in the development of a work outside the educational field, supervised, directed and linked to the exercise of the activity in an appropriate professional environment (public or private).
- To be able to honour the commitments acquired with the collaborating entity and with the university in relation to the external internship.
- To be able to adequately draft an Activities Report in which the proposed and achieved objectives are reflected, as well as a detailed description of the activities carried out, explicitly including their contribution to the promotion of sustainable development in any of its aspects, within the framework of the UN Agenda 2030.
- To be able to establish the relationship between the contents of the master's degree and the work performed, taking into account the general and specific competencies as well as the skills and aptitudes for professional development.
- To be able to carry out an evaluation of the process and formulate proposals for improvement.

3. Syllabus

There is not a specific program since the contents of the internship are varied.

4. Academic activities

- Tutoring sessions.
- Working days adapted to the circumstances of the collaborating entity and the student.
- Autonomous work of the student.

5. Assessment system

At the end of the internship, the Tutor of the collaborating entity shall prepare a report according to a standardized form established by Universa, assessing the student's activity during the internship, and shall send it to Universa, which in turn shall send it to the student's academic tutor at the university. Percentage of final grade: 50%.

The academic tutor will evaluate the student and the Final Report of the external Internship submitted by them according to the EPS (Higher Polytechnic School) model. Percentage of final grade: 50%.

In the event that the student has not completed at least 90% of the established classroom hours at the internship site, an unfavourable final report of the internship will be issued. This will mean the grade is "failed". The numerical grade, CF, will be weighted to the number of actual hours in the collaborating entity with a maximum of 4.0 corresponding to 89% of the total.

Calculation of the Final Rating, CF:

CF = 50% tutor in the entity + 50% academic tutor

If the minimum requirements are not reached in the evaluation activities of the entity part (5 points out of 10) and of the academic part (5 points out of 10), the subject will not be passed, even if the final grade, CF, according to the weighted average is equal to or higher than 5. So, in that case, if:

CF \geq 4, the final grade will be: Fail, 4.

CF < 4, the final grade will be: Fail, CF.
