

Academic Year/course: 2022/23

**25259 -**

## Syllabus Information

---

**Academic Year:** 2022/23

**Subject:** 25259 -

**Faculty / School:** 201 - Escuela Politécnica Superior

**Degree:** 571 - Degree in Environmental Sciences

**ECTS:** 6.0

**Year:** 4

**Semester:** Second Four-month period

**Subject Type:** Compulsory

**Module:**

## 1. General information

## 2. Learning goals

## 3. Assessment (1st and 2nd call)

## 4. Methodology, learning tasks, syllabus and resources

### 4.1. Methodological overview

The learning process designed for this subject is based on the following:

Along with expository and participative classroom lectures, there are practical case study sessions (participative-active-interrogative type activities) and analysis of environmental administrative information from local and autonomous administrations.

### 4.2. Learning tasks

The program offered to the student to help him/her achieve the expected results includes the following activities....

1 Theoretical expository classes. They will consist of the exposition of lectures, motivating the participation of the students. Its purpose is to transmit the notions of the subject in a clear, systematic and synthetic way. It is intended to arouse interest in the subject and motivate the student in their individual study and that the master class is a dialogue in which not only is exposed but also questions are asked, doubts are resolved, discussed and debated.

2 Resolution of problems and cases.

3 Practice of computer programs.

4 Work assignments.

5 Tutorials: sessions that, at the request of the students, should solve doubts about the previous activities. Follow-up of the works: besides attending the doubts arisen from the theory part, they carry out a follow-up and orientation of the personal works of the students.

The tutoring schedule will be detailed in <https://directorio.unizar.es/#/tutoria?colectivo=PDI&;codCentro=201>.

It is possible to arrange a tutoring session with the professor at other times, either in person or by e-mail, and it is also possible to make queries by the same means.

### 4.3. Syllabus

## Theory program

- 1-Introduction. Concept, objectives and characteristics of projects.
- 2-Types of projects. The phases of a project. General framework.
- 3-Contents of a classic project.
- 4-The project in the company. Management and Direction.
- 5-Detection of opportunities. Customer, market and product. Business plan. Commercial opportunities. Tenders. Public Administration Contracts Law.
- 6-Evaluation of the project and activities.
- 7-Preparation of bids and their presentation. Award of the work
- 8-Project follow-up. Bid and contract review. Organization and gathering of resources. Project configuration control. Project scope changes. Application to Environmental Projects.
- 9-Project closure. Acceptance. Closure report. Indicators of project results.

The practical activities are divided into:

- Study of specific projects.
- Study of environmental impact assessment reports.
- Drafting of Environmental Assessment Reports
- Drafting of Environmental Monitoring Reports
