

Academic Year/course: 2022/23

31110 - Geographical Variations of Aragonese

Syllabus Information

Academic Year: 2022/23

Subject: 31110 - Geographical Variations of Aragonese

Faculty / School: 202 - Facultad de Ciencias Humanas y de la Educación

Degree: 299 - Degree in Primary School Education

ECTS: 6.0

Year: 4

Semester: First semester

Subject Type: Optional

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

The teaching-learning process of the subject Diatopic Variation of Aragonese will be developed in Aragonese by:

- theoretical classes, which will consist of the exposition and explanation of the different topics of the program;
- practical classes of linguistic geography, which will consist of the analysis, re-elaboration and interpretation of linguistic maps;
- practical classes on reading, analysis and commentary on dialect texts in the various varieties diatopics of Aragonese;
- individual work of students reading texts in different diatopic varieties, preparation maps of isoglosses from a given material and analysis and commentary on dialect texts.

The tutorial follow-up and the direction of works can be carried out electronically.

For the study of the phonetic, morphological, syntactic and lexical characteristics of each variety diatopic will be used both deductive methods (identification of a variety from the recognition of the characteristics studied) and inductive (establishment of the characteristics of a given variety from reading texts).

4.2. Learning tasks

- Theoretical classes with expositive sessions: explanation of the different topics of the program.
- Linguistic geography practical classes: analysis, re-elaboration and interpretation of maps linguistic; making linguistic maps from a given material.
- Practical classes on reading, analysis and commentary on dialect texts in various varieties Aragonese diatopics: recognition in the texts of the specific characteristics and, from these, deduction of the

diatopic variety; establishment by induction, from the reading and the analysis of texts, of the characteristics of a given diatopical variety.

- Audio of various diatopic varieties: analysis, discussion, interpretation
- Development of individual work, by the students, of analysis, re-elaboration and interpretation of linguistic maps: recognition of isoglosses and dialect areas.
- Preparation of individual works, by the students, of analysis and commentary of texts in different diatopic varieties: description and classification of linguistic characteristics and, from there, by means of the opportune argumentation, identification of the diatopic variety.

4.3. Syllabus

Contents: phonetic, morphological, syntactic and lexical characteristics. manifestations written and oral. Studies and publications related to each of them. geography methods linguistics: isoglosses and dialectal areas.

1. Linguistic geography and dialectology. General concepts. Linguistic atlases and their exploitation. dialect monographs. Other materials for the study of areas linguistics and diatopical varieties.
