

Academic Year/course: 2022/23

60983 - Radionavegation and guidance systems

Syllabus Information

Academic Year: 2022/23

Subject: 60983 - Radionavegation and guidance systems

Faculty / School: 110 - Escuela de Ingeniería y Arquitectura

Degree: 623 - Master's Degree in Telecommunications Engineering

ECTS: 3.0

Year: 2

Semester: Second semester

Subject Type: Optional

Module:

1. General information

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

Methodology:

1. Lectures laying the theoretical foundations of the course. This task will be classroom-based and will rely on material previously delivered to the student (or available online).
2. Problems and case studies. Problems and cases appointed by the instructor, to be solved by the students or the teacher himself, based on the programmed lectures. This activity will be classroom-based.
3. Lab Sessions . Laboratory assignments of 2 hours each, to be performed in laboratories L.3.06 (Laboratorio de Alta Frecuencia) and/ or L.2.0.2 at the Ada Byron building whenever possible, under the actual circumstances. Small groups of students will carry out simulations and experimental measurements using test equipment related to radio and acoustic wave radiation and propagation, in order to support the knowledge acquired during the lectures. This activity will require presence at the laboratory.
4. Personal attention through academic tutoring.

4.2. Learning tasks

Classroom-based learning:

Lectures and cases according to the detailed syllabus on section 4.3 will be preliminary focused on the following topics:

1. Radionavigation Algorithms. GNSS hardware and software.
2. Aeronautical Radionavigation.

4.3. Syllabus

Unit 1. Introduction.

Unit 2. Advanced Radionavigation Algorithms.

Unit 3. Aeronautical Radionavigation.

4.4. Course planning and calendar

Distribution of activities:

- Lectures and problems: two hours a week during the semester (half)
- laboratory sessions of 2 hours each, in reduced groups

Lecture and laboratory session schedules together with evaluation dates will be provided by the university before the beginning of the semester.

4.5. Bibliography and recommended resources
