

Academic Year/course: 2022/23

69769 - Supplementary Course in Law

Syllabus Information

Academic Year: 2022/23

Subject: 69769 - Supplementary Course in Law

Faculty / School: 100 - Facultad de Ciencias

Degree: 627 - Master's Degree in Circular Economy

ECTS: 3.0

Year: 01

Semester: First semester

Subject Type: ENG/Complementos de Formación

Module:

1. General information

1.1. Aims of the course

The *Law Supplements* course allows to achieve the knowledge and skills on Law necessary for the adequate follow-up of the compulsory and optional subjects of the Master's Degree in Circular Economy. These approaches and aims are aligned with Sustainable Development Goal (SDG) No. 12 (Responsible Consumption and Production) of the United Nations 2030 Agenda (<https://www.un.org/sustainabledevelopment/es/>), in such a way that the acquisition of the learning results of the subject provides training and competence to contribute to a certain extent to its achievement.

1.2. Context and importance of this course in the degree

The course of Law Supplements is taught in the first months of the teaching of the Master's Degree in Circular Economy. This subject is aimed mainly at graduates of Science and Engineering degrees. The subject is taught from the University of La Rioja.

1.3. Recommendations to take this course

Complements of Law is a very new course for Master's students with very little training in Law. Regular use of the learning platform and daily study of the concepts presented are recommended, with special emphasis on solving practical activities. Likewise, it is vital to consult the doubts and questions that pose difficulties in the learning process, for which personalised tutorials should be used.

2. Learning goals

2.1. Competences

BASIC COMPETENCES

CB6 - Have demonstrated knowledge and understanding that is founded upon and extends and/or enhances that typically associated with the first cycle, and that provides a basis or opportunity for originality in developing and/or applying ideas, often within a research context.

CB7 - Can apply their knowledge and understanding, and problem solving abilities in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their field of study.

CB8 - Have the ability to integrate knowledge and handle complexity, and formulate judgements with incomplete or limited information, but that include reflecting on social and ethical responsibilities linked to the application of their knowledge and judgements.

CB9 - Can communicate their conclusions, and the knowledge and rationale underpinning these, to specialist and nonspecialist audiences clearly and unambiguously.

CB10 - Have the learning skills to allow them to continue to study in a manner that may be largely self-directed or autonomous.

GENERAL COMPETENCES

CG1 - Obtain information in Spanish and English using information technologies efficiently

CG2 - Manage, critically analyse and synthesise information

CG3 - Critically reflect in a systemic way and using causal relationships

CG4 - Formulate, analyse, evaluate and compare in a multidisciplinary way new or alternative solutions for different problems

CG5 - Work in interdisciplinary groups

CG6 - Transmit information efficiently through information and communication technologies

CG7 - Develop management skills (decision making, goal setting, problem definition, design, and evaluation)

CG8 - Properly manage available resources on time

SPECIFIC COMPETENCES

CE1 - Manage the vocabulary and concepts necessary for learning the fundamentals of Circular Economy.

2.2. Learning goals

2.2. Learning goals

The student, passing this subject, achieves the following results:

1. Know the main characteristics of public powers and public administrations.
2. Know the main guarantees of people in their relations with the Administration.
3. Be able to recognise the main implications for the company of the commercial, labor, and tax legislation applicable to the company.

2.3. Importance of learning goals

Obtaining the learning results is essential for proper monitoring of the compulsory and optional subjects of the Master in Circular Economy.

3. Assessment (1st and 2nd call)

3.1. Assessment tasks (description of tasks, marking system and assessment criteria)

? Written test with several multiple choice test questions: 100%. The test will be held simultaneously at each university under conditions that guarantee the proper identification of students and the impossibility of fraud in them.

The number of official exam sessions to which enrollment entitles (2 per enrollment) as well as the consumption of these calls will be adjusted to the Rules of Permanence in Master's Studies and the Rules of Learning Assessment of the University of Zaragoza (<https://ciencias.unizar.es/normativas-asuntos-academicos>). To this last regulation, the general criteria for the design of the tests and the grading system will also be adjusted, and according to the same, the time, place and date on which the review will be held when publishing the qualifications will be made public.

4. Methodology, learning tasks, syllabus and resources

4.1. Methodological overview

Learning in this subject is based on the combination of the expository method and the flipped classroom.

According to the expository method, the professor develops the presentation of the topics before the students present in the same classroom or in other universities through videoconference. In addition, other learning materials will be included in the Moodle platform that will allow dedicating some of the classes to interact with students, posing questions that allow relating concepts.

The approach, methodology and evaluation of this guide are prepared to be the same in any teaching scenario. They will be adjusted to the socio-sanitary conditions of each moment, as well as to the indications given by the competent authorities.

4.2. Learning tasks

This is a 6 ECTS credits course organised as follows:

- Lectures (1.6 ECTS credits: 16 hours). Whole group sessions of 50 minutes each one will be taken. Lecturers explain the theoretical contents and solve representative applied problems. Learning materials will be available on the virtual platform Moodle (<https://moodle.unizar.es/add/course/view.php?id=42045&lang=en>). Regular attendance is highly recommended.
- Practice sessions (4.4 ECTS credits: 44 hours, including 8 face-to-face hours).
- Autonomous work and study (8.4 ECTS credits: 84 hours). Students are expected to study theory
- Assessment tasks (0.6 ECTS credits: 6 hours). A written test with several multiple choice test questions will be carried out.

4.3. Syllabus

1. The legal system: sectors and sources. 1.1. The Law and the branches of the legal system.- The Law: conceptions. Natural law and positive law. Objective and subjective right.
