

26024 - Activities for Functional Independence VI: Occupational Capacity and Joining the Job Market

Información del Plan Docente

Academic Year	2016/17
Academic center	127 - Facultad de Ciencias de la Salud
Degree	276 - Degree in Occupational Therapy
ECTS	6.0
Course	4
Period	Annual
Subject Type	Compulsory
Module	---

1. Basic info

1.1. Recommendations to take this course

1.2. Activities and key dates for the course

2. Initiation

2.1. Learning outcomes that define the subject

2.2. Introduction

3. Context and competences

3.1. Goals

3.2. Context and meaning of the subject in the degree

3.3. Competences

3.4. Importance of learning outcomes

4. Evaluation

5. Activities and resources

5.1. General methodological presentation

Brief description of the subject's objectives:

The subject is developed within the context of the study of human activity, deepening the effect of those activities in the independent operation and health of the people.

The subject will lead the student towards the knowledge and the application of tools, techniques and professional skills of intervention and evaluation, which are used in the process of occupational therapy, in the area of occupational

26024 - Activities for Functional Independence VI: Occupational Capacity and Joining the Job Market

performance of work.

The learning process that has been designed for this subject is based on the following:

A mixed orientation, both theoretical and applied, so that the activities are planned thinking about the acquisition of knowledge and skills that the student needs in order to develop the process of occupational therapy in the area of work.

The materials of the course will be presented through the Digital Teaching Platform.

5.2.Learning activities

The programme that is offered to the students to help them to achieve the predicted results includes the following activities...

1. Theoretical classes in a large group (50 hours).

Explanation of the different contents of the subject, directing the group towards the acquisition of competences and learning results.

2. Workshops / practical seminars in reduced groups (12.5 hours).

Analysis and solution of different practical assumptions, putting into practice the theoretical basis of the course.

3. Individual work (12.5 hours).

Individual work unites a personal study of the subject, analysis and study of the materials presented in the Digital Teaching Platform and the work in groups.

4. Study and evaluation (75 hours).
