

25205 - Environmental administration and law

Información del Plan Docente

Academic Year	2016/17
Academic center	201 - Escuela Politécnica Superior
Degree	571 - Degree in Environmental Sciences 277 - Degree in Environmental Sciences
ECTS	6.0
Course	1
Period	Second Four-month period
Subject Type	Basic Education
Module	---

1. Basic info

1.1. Recommendations to take this course

1.2. Activities and key dates for the course

2. Initiation

2.1. Learning outcomes that define the subject

2.2. Introduction

3. Context and competences

3.1. Goals

3.2. Context and meaning of the subject in the degree

3.3. Competences

3.4. Importance of learning outcomes

4. Evaluation

5. Activities and resources

5.1. General methodological presentation

The learning process of this subject is based on these attributes:

1. *Theoretical explanatory classes. Study and individual work.* The teacher will explain the basic notions of the theoretical and practical program. The students will carry out a complementary work reading the documents that are published in the electronic platform of the subject.

25205 - Environmental administration and law

2. *Resolution of questionnaires and juridical problems. Study and individual work.* Comment in the classroom. Delivery of results to the teacher. The students must solve the questionnaires and practical exercises, in conformity with the chronogram published in the electronic platform of the subject. For it they will help themselves with the dossiers published by the teacher, legislation, databases and other electronic tolos.

3. *Literature review. Study and individual work. Delivery of results to the teacher and oral exhibition.* The preparation of this work for the students will come preceded from the corresponding meetings of tutorship.

5.2.Learning activities

The program foreseen to achieve the results of learning understands the following activities:

1. *Theoretical explanatory classes.* The teacher explains the lessons stimulating the participation of the pupils. His purpose is to transmit the notions of the subject of a clear, systematic, synthetic and pleasant form. Also one tries to wake the interest up for the subject and to motivate the student in your individual study.

The teacher will explain the juridical concepts, institutions and fundamental beginning of the environmental Law. This explanation will not be exclusively theoretical or conceptual, because she will highlight the practical utility of the knowledge that are transmitted. It is a question of promoting thoughts and critical attitudes before the Law.

2. *Resolution of questionnaires and juridical problems .* The teacher will publish the exercises in the electronic platform of the subject. The delivery will take place across the own platform.

The students must check the dossiers supplied by the teacher before solving the exercises. Later, they must read the exercise completely, trying to identify, in outline, the topics that sublie to the questions. It is necessary to understand the content of the proposed case and to dominate the technical, theoretical or legal questions that it provokes.

On the base of the previous thing, they must answer all the questions of discursive and reasoned form. Every response must be sufficiently argued. It is a question of demonstrating what has studied and understood. It is not a question of finding only the correct response but to demonstrating a good reasoning in Law and the knowledge of the matter. There will be valued, likewise, the personal contributions and the application of all the knowledge related to the questions.

3. *Elaboration of a bibliographical review.* This individual work will be tutelado for the teacher. A bibliographical review is, fundamentally, an explanatory brief work on the content of any type of document, with two basic pretensions: to be synthetic and critical.

This work must emphasize the fundamental of the analyzed document, the basic structure and fundamental ideas that support it and the keys of reading that allow to understand his your content. It is not a question of a simple summary, since the aim is to offer light on the totality of the document that is analyzed and to be positioned critically before the same one.

In addition, the review must be a critique. It is not a question of judging the content of the document depending on our own tastes or criteria, but to indicating the problems that provoke about the exhibition written by the author, the lagoons or the current importance of the current importance of the topic.

As general orientation the review should serve to introduce in the reading of the document the new readers. Everything

25205 - Environmental administration and law

what is said must serve to this lens, provoking the interest.

Finally, there must be born in mind that the aspects relative to the organization of the content, rules of edition and draft and calendar of tutorships, delivery and oral defense will publish in the electronic platform of the subject.
