

28311 - Population Geography

Información del Plan Docente

Academic Year	2016/17
Academic center	103 - Facultad de Filosofía y Letras
Degree	419 - Degree in Geography and Land Management
ECTS	6.0
Course	2
Period	First semester
Subject Type	Compulsory
Module	---

1. Basic info

1.1. Recommendations to take this course

1.2. Activities and key dates for the course

2. Initiation

2.1. Learning outcomes that define the subject

2.2. Introduction

3. Context and competences

3.1. Goals

3.2. Context and meaning of the subject in the degree

3.3. Competences

3.4. Importance of learning outcomes

4. Evaluation

5. Activities and resources

5.1. General methodological presentation

The learning and teaching methodology developed in the course is aimed to promote the attainment of its objectives. A range of teaching and learning activities is implemented, such as interactive lessons, practical exercises, group activities, and private study.

A high level of student participation will be required from all students throughout the course.

Extensive material will be available *via* the Moodle site of the course. This offers a variety of resources including a

28311 - Population Geography

repository of the lecture notes used in class, a course syllabus as well as other forms of course-specific materials.

5.2.Learning activities

Lecture sessions 37 hours

Practical activities: Interactive, individual or group activities 15 hours

Directed activities 20 hours

Field work 4 hours

Private study 75 hours

Assessment 3 hours

5.3.Program

I: Introduction to Population Geography

II: Geographic Distribution of Population

III: Population Composition

IV: Fertility and Mortality

V: Population mobility

VI: Population Growth and policies

5.4.Planning and scheduling

The course is divided into 6 thematic blocks and 30 sessions. The first block includes the following lessons: Data source and Population theories; it runs during the first 3 weeks of the term. The second thematic block includes Urbanization process and distribution patterns and runs during the following 4 weeks. The third thematic block includes geodemography of Aging and sex composition; it runs during the following 5 weeks. The fourth block includes Fertility Trends and implications, Mortality Patterns and Demographic Transitions and it is developed during the following 6 weeks. The fifth thematic block includes the Migration and mobility process and runs during the following 7 weeks. The final block covers the Population Change, Projections, world Population trends and Population Policies, it runs at the final weeks of the semester.
