

30049 - Industrial Quality

Información del Plan Docente

Academic Year 2016/17

Academic center 110 - Escuela de Ingeniería y Arquitectura

Degree 436 - Bachelor's Degree in Industrial Engineering Technology

ECTS 6.0
Course 4

Period First semester

Subject Type Optional

Module ---

- 1.Basic info
- 1.1.Recommendations to take this course
- 1.2. Activities and key dates for the course
- 2.Initiation
- 2.1.Learning outcomes that define the subject
- 2.2.Introduction
- 3.Context and competences
- 3.1.Goals
- 3.2. Context and meaning of the subject in the degree
- 3.3.Competences
- 3.4.Importance of learning outcomes
- 4.Evaluation
- 5. Activities and resources
- 5.1.General methodological presentation

The learning process designed for this course is based on the following:

A lecturing program based on 30 hours of lectures in class, 12 hours of problems, 15 hours of laboratory sessions and company visits or workshops, as well as the fulfillment of a practical Project (60 hours). The project will be carried out either individually or in groups of 3 or 4 students.

The practical sessions in laboratory will last 2,5 hours each, one day every two weeks approximately. As in the theoretical

30049 - Industrial Quality

lectures, students will be provided with the guide for the practical work good in advance.

Both the sessions in classroom and in laboratory will provide the student with knowledge and skills to carry out different practical cases. These will be given to the students for them to apply different techniques learned in class to a specific real case decided at the beginning of the course.

The evaluation is centered on practical aspects. Team work and individual effort will be encouraged. The course has been planned for the student to have a balanced load of work every week.

5.2.Learning activities

The program offered to the students to help them to obtain the expected learning outcomes includes theoretical and practical lectures in the classroom, laboratory sessions and visits to companies.

5.3.Program

Contents

- 1. Quality Management System ISO9000
- 2. EFQM Model
- 3. Environmental, Health and safety management systems
- 4. Social Accountability
- 5. Lean
- 6. Purchasing Quality
- 7. Reliability

Laboratory sessions

- 1. Company visit
- 2. Quality Management System
- 3. Self assessment according to the EFQM model
- 4. Lean

6. Company visit

5.4. Planning and scheduling

All the theoretical, practical and laboratory sessions will take place according to the schedule and calendar provided by the Escuela de Ingeniería y Arquitectura, which are available on its web site (http://eina.unizar.es)

5.5.Bibliography and recomended resources

Students could be find additional information and resources using the library support, for example clicking on http://biblioteca.unizar.es/como-encontrar/bibliografia-recomendada
