

29345 - Oral Medicine for Paediatric Patients

Información del Plan Docente

Academic Year	2016/17
Academic center	229 - Facultad de Ciencias de la Salud y del Deporte
Degree	442 - Degree in Odontology
ECTS	3.0
Course	3
Period	Second semester
Subject Type	Optional
Module	---

1.Basic info

1.1.Recommendations to take this course

1.2.Activities and key dates for the course

2.Initiation

2.1.Learning outcomes that define the subject

2.2.Introduction

3.Context and competences

3.1.Goals

3.2.Context and meaning of the subject in the degree

3.3.Competences

3.4.Importance of learning outcomes

4.Evaluation

5.Activities and resources

5.1.General methodological presentation

The learning process that is designed for this subject is based on the following:

Participatory lecture 20h

10h of practical sessions

29345 - Oral Medicine for Paediatric Patients

Individual work and tutorial 10h

5.2.Learning activities

The program that the student is offered to help you achieve the expected results includes the following activities ...
THEORETICAL CONTENTS keynote lectures on the agenda , with explanatory examples and numerous images and clinical cases PRACTICAL CONTENTS Practices in health center primary care in the department of pediatrics * Clinical examination of the mouth of the child and adolescent * Exploration and child stomatognathic imaging supported * Presentation of clinical cases Developing a practical guide with all learned in the health center content literature review on issues related to the subject
