

30743 - Construction 4B

Información del Plan Docente

Academic Year	2016/17
Academic center	110 - Escuela de Ingeniería y Arquitectura
Degree	470 - Bachelor's Degree in Architecture Studies
ECTS	6.0
Course	5
Period	Second semester
Subject Type	Optional
Module	---

1.Basic info

1.1.Recommendations to take this course

1.2.Activities and key dates for the course

2.Initiation

2.1.Learning outcomes that define the subject

2.2.Introduction

3.Context and competences

3.1.Goals

3.2.Context and meaning of the subject in the degree

3.3.Competences

3.4.Importance of learning outcomes

4.Evaluation

5.Activities and resources

5.1.General methodological presentation

The learning process designed for this subject is based on the following:

1. The acquisition of basic knowledge is mainly developed through participatory lectures and small case studies.
2. The application of knowledge is done through workshop classes in which students will develop a final work under the

30743 - Construction 4B

supervision of teachers, presenting and defending the solutions adopted.

3. The tutorials will serve to review both knowledge and the work done by the student.

To follow the theory the student will have the teaching materials developed by teachers and various materials of interest to increase motivation and curiosity to eventually continue learning individually.

5.2.Learning activities

5.3.Program

1. Introduction
2. Technical conditions. Pre-existent
3. Street design
4. Construction of the road. Geometry
5. Construction of the road. Structure
6. Pedestrian space and the bicycle
7. Driveway and parking
8. Details and pathologies
9. Landscape, green areas and gardens
10. Urban furniture

5.4.Planning and scheduling

Two hours of weekly theoretical knowledge will be taught. The theoretical teaching of the subject will be developed through participatory lectures.

Complementarily two hours a week will be developed and taught as workshop classes in which students will develop the knowledge acquired in theory. The practices will focus on the constructive resolution of a design for a public space, to be delivered at the end of the course.

Throughout the course they will make several partial deliveries of work, announced in advance through e-mail and the moodle platform, indicating the work to be included. There will be a final delivery of all the work, the deadline shall be determined in coordination with deliveries of works of other subjects.

The student will be evaluated through a system of continuous assessment. Students who do not opt for continuous assessment, who do not pass the subject by this procedure, or who want to improve their final score, are entitled to present to a final global test, prevailing in any case, the best test scores

5.5.Bibliography and recommended resources
