62233 - Master's Dissertation

Información del Plan Docente

Academic Year	2016/17
Academic center	110 - Escuela de Ingeniería y Arquitectura
Degree	534 - Master's in IT Engineering
ECTS	15.0
Course	2
Period	First semester
Subject Type	Master Final Project
Module	---

1.Basic info

1.1.Recommendations to take this course

1.2.Activities and key dates for the course

2.Initiation

2.1.Learning outcomes that define the subject

2.2.Introduction

3.Context and competences

3.1.Goals

3.2.Context and meaning of the subject in the degree

3.3.Competences

3.4.Importance of learning outcomes

4.Evaluation

5.Activities and resources

5.1.General methodological presentation

The learning process is based on the practical application of skills acquired in the master. For this purpose two types of activities will be addressed:

Development of a project
The project will aim to develop the different skills acquired in the master to develop a solution to a given problem, serving as the integrating element seen in different subjects.

Tutoring by the teacher / advisor
Monitoring and support of a tutor to review and discuss the materials and progress of the work.

5.2.Learning activities

The course consists of 15 ECTS credits posed by the estimated 375 hours of student dedication:

- 25 hours, approximately, mentoring of work by the teacher or the advisor of the work.
- 349 hours of student work.
- 1 hour devoted to various evaluation tests.

5.3.Program

The embodiment of the Final Master Work comprises the following steps:

- Development of the proposed work.
- Carrying out the work specified.
- Development of the specification of the work performed.
- Presentation and defense of the work done in court.

5.4.Planning and scheduling

The student will agree with his/her tacher and/or advisor the monitoring sessions.
The deposit and defense of the work will be done in the time bands set by the School of Engineering and Architecture, and published on its website.

5.5.Bibliography and recomended resources
