

Información del Plan Docente

Academic Year	2017/18
Faculty / School	201 - Escuela Politécnica Superior
Degree	277 - Degree in Environmental Sciences 571 - Degree in Environmental Sciences
ECTS	6.0
Year	1
Semester	Four-month period
Subject Type	Basic Education
Module	---

1.General information**1.1.Introduction****1.2.Recommendations to take this course****1.3.Context and importance of this course in the degree****1.4.Activities and key dates****2.Learning goals****2.1.Learning goals****2.2.Importance of learning goals****3.Aims of the course and competences****3.1.Aims of the course****3.2.Competences****4.Assessment (1st and 2nd call)****4.1.Assessment tasks (description of tasks, marking system and assessment criteria)****5.Methodology, learning tasks, syllabus and resources****5.1.Methodological overview**

The learning process that has been designed for this course is based on the following activities:

In the process of learning, different teaching methods will be used: expository didactic techniques for the theoretical

classes and more participatory techniques will also be used. This second type of activities allows student involvement in the learning process and allows the teacher to realise the problems and concerns that may arise in the various topics.

In addition to the scheduled classes, the student must make an effort to study and be familiar with the basic content of the course.

5.2.Learning tasks

The programme offered to the students to help them achieve the learning results includes the following activities:

1: Theoretical Classes: these will consist of lectures, in which the fundamental concepts of the topics of the programme will be explained by the teacher.

2: Practical Classes: two kind of activities will be used:

- Activities to learn theoretical concepts but with the active participation of the students, because they will apply already acquired knowledge to the understanding of new concepts.
- Resolution of practical exercises.

3: Tutorials: they allow a more direct and personal support to students in order to answer questions about the contents of the subject and guide them in their studies and in the resolution of exercises. These tutorials may be individual or in a group.

5.3.Syllabus

Theory Program

PART I. BASIC ECONOMICS

Lesson 1. What is Economics?

Lesson 2. How markets work. The market. Supply and Demand

Lesson 3. Market structure: Perfect and imperfect competition
