

**Información del Plan Docente**

<b>Academic Year</b>	2017/18
<b>Faculty / School</b>	107 - Facultad de Educación 202 - Facultad de Ciencias Humanas y de la Educación 301 - Facultad de Ciencias Sociales y Humanas
<b>Degree</b>	301 - Degree in Nursery School Education 302 - Degree in Nursery School Education 303 - Degree in Nursery School Education
<b>ECTS</b>	6.0
<b>Year</b>	1
<b>Semester</b>	First semester
<b>Subject Type</b>	Basic Education
<b>Module</b>	---

**1.General information****1.1.Introduction**

The subject "Observation in the school" is part of the basic training of the teacher in Infant Education and it is placed in the first term of the first year of this degree. It will provide the student with the appropriate knowledge and techniques that will allow him/her to capture, in an appropriate way, all the relevant information created in the educational context, indispensable for the knowledge and the evaluation of people and contexts.

**1.2.Recommendations to take this course****1.3.Context and importance of this course in the degree****1.4.Activities and key dates****2.Learning goals****2.1.Learning goals**

The student, to be able to pass the subject, will have to demonstrate the following results:

1. Comparing different types of observations and adapting their use to specific situations; being able to identify the main contributions of observations in Infant Education. Also, identifying and defining the functions and phases to follow in the process of observation.
2. Describing the characteristics that observations must have, as a technique for collecting valid and reliable data.
3. Analyzing and assessing the process of production and application of different tools of observation.
4. Creating an instrument of observation that guarantees the quality of the data and being capable of recording and interpreting the information gathered by using it.
5. Evaluating and interpreting scientific articles following the guidelines given in class.

**2.2.Importance of learning goals**

### **3.Aims of the course and competences**

#### **3.1.Aims of the course**

#### **3.2.Competences**

### **4.Assessment (1st and 2nd call)**

#### **4.1.Assessment tasks (description of tasks, marking system and assessment criteria)**

### **5.Methodology, learning tasks, syllabus and resources**

#### **5.1.Methodological overview**

The methodology followed in this course is oriented towards achievement of the learning objectives. It is based on active participation, case studies, teamwork etc. that favors the development of communicative skills and critical thinking. A wide range of teaching and learning tasks are implemented, such as lectures, practical activities, practice sessions, autonomous work, tutorials, and academic guidance.

Further information regarding the course will be provided on the first day of class.

#### **5.2.Learning tasks**

The course includes 6 ECTS organized according to:

- Lectures (3 ECTS): 30 hours.
- Practice sessions (2 ECTS): 20 hours.
- Autonomous work ( ECTS): 87 hours.
- Tutorials (1 ECTS): 10 hours.
- Assessment (0,3 ECTS): 3 hours.

Lectures: the professor presents theoretical contents.

Practice sessions: they can involve discussion and presentation of case studies, practical work outside the classroom (field work or visits), and seminars.

Autonomous work: students do tasks such as autonomous study, reading of the course book, preparation of practice sessions and seminars, and summative assignments.

Tutorials: professors' office hours can be used to solved doubts and to follow-up

students' work.

Assessment: final examination

### **5.3.Syllabus**

The contents of this subject are going to provide for the future teacher in Infant Education the necessary competences for the best knowledge of the students, the context in which they develop, the teaching-learning process, formal and informal evaluations, etc.

All of these aspects, certainly, will contribute to his quality as an educator, something that will help the integral development of his/her future pupils. The contents that they are going to deal with are in the areas of:

1. Introduction to observation and the Infant school: observation in the educational process of children. Professional ethics.
2. The process of systematic observation: planning and design. Instruments of observation and registration. Registration and data codification. Quality control of the data collected.
3. Analysis of data depending on the aims and design of observation.
4. Preparation of the observation report.

### **5.4.Course planning and calendar**

For further details concerning the timetable, classroom and further information regarding this course please refer to the Facultad de Educación de Zaragoza website (<http://educacion.unizar.es/>); the Facultad de Ciencias Humanas y Sociales de Teruel website (<https://fcsh.unizar.es/>) and the Facultad de Ciencias Humanas y de la Educación de Huesca (<https://magister.unizar.es/>).
