

## 28335 - Natural Risks Analysis

### Información del Plan Docente

Academic Year	2017/18
Faculty / School	103 - Facultad de Filosofía y Letras
Degree	419 - Degree in Geography and Land Management
ECTS	6.0
Year	
Semester	Half-yearly
Subject Type	Optional
Module	---

### **1.General information**

#### **1.1.Introduction**

#### **1.2.Recommendations to take this course**

#### **1.3.Context and importance of this course in the degree**

#### **1.4.Activities and key dates**

### **2.Learning goals**

#### **2.1.Learning goals**

#### **2.2.Importance of learning goals**

### **3.Aims of the course and competences**

#### **3.1.Aims of the course**

#### **3.2.Competences**

### **4.Assessment (1st and 2nd call)**

#### **4.1.Assessment tasks (description of tasks, marking system and assessment criteria)**

### **5.Methodology, learning tasks, syllabus and resources**

#### **5.1.Methodological overview**

The learning and teaching methodology developed in the course is aimed to promote the attainment of its objectives. A wide range of teaching and learning activities is implemented, such as interactive lessons, practical exercises, individual or group activities, directed activities, field work and private study.

A high level of student participation will be required from all students throughout the course.

## 28335 - Natural Risks Analysis

Extensive material will be available *via* the Moodle site of the course. This offers a variety of resources including a repository of the lecture notes used in class, as well as other forms of course-specific materials, including a discussion forum.

### 5.2.Learning tasks

Lecture sessions: 18,75 hours

Practical activities: Interactive, individual or group activities: 28,75 hours

Directed activities: 12,5 hours

Field work: 12,5 hours

Private study: 75 hours

Assessment: 2,5 hours

### 5.3.Syllabus

1. Analysis and management of natural risks: basic concepts, typology of risks, methodologies of analysis, management principles, forecast and prevention, natural risks and land management.
2. Meteorological and climatic risks: extreme temperatures, rainfall, drought, wind.
3. Hydrological risks: floods, extreme marine processes.
4. Risks from internal geodynamics: volcanoes, earthquakes, tsunami.
5. Risks from external geodynamics: avalanches, slope processes, subsidences, other geomorphic processes.
6. Other natural risks: cosmic, physical, chemical and biological.

### 5.4.Course planning and calendar

The course is divided into 6 thematic blocks.

The field works will be in group: the first one at the beginning of April (block 3) and the second one in the middle of May (block 5).

For further details concerning the timetable, classroom and other information of the course please refer to the

"*Facultad de Filosofía y Letras*" web site (<https://fyl.unizar.es/horario-de-clases#overlay-context=horario-de-clases>)
