### 5.2.Learning tasks

#### Master Class

This teaching methodology within the subject Legal Dentistry and Bioethics is oriented to place the student in each of the topics that make up matter. It allows to present each topic from a global perspective, placing it in the field of matter. This facilitates the integration of its content with the content of other subjects.

The aim of this method within the Legal and Bioethics Dentistry is to provide information tailored to the level of the student. Through the realization of each of the themes of the selection of the most important aspects for the student. This aims to facilitate understanding of the main concepts of the subject.

To facilitate the presentation of the topics power-point presentations are used. Moreover, such presentations the student is provided for further study.

Another of the objectives pursued with the main class is to promote student participation in class, interspersing questions during exposure or comments on newspaper articles, radio news and television news to show interest partner of the topics covere.

The master class is sufficient to cover only the targets for the transmission of knowledge and understanding, not being able to reach the analysis and application of acquired knowledge. To achieve these objectives are used in the course of Legal Dentistry and Bioethics Seminars and independent work of the student.

#### Practical classes

This method of teaching is essential in a discipline such as Bioethics Dentistry legal and whose knowledge and preparation are achieved when they are able to understand and resolve individual cases using general concepts observed in the conference.

Its main purpose is to teach the student to reason with the criteria and seen in lectures contents, apply those acquired knowledge, thus contributing to their settlement.

#### Autonomous student work

Elaboration of two works, one of them will develop a theme of the program content of the subject proposed by the teacher to be presented in class by the student

#### Tutorials

## 29307 - Legal and bioethical odontology

They aim to resolve any doubts that may have the student during the study of the subject, as well as orient and guide the student conducting case studies and documents to be made.

### 5.3.Syllabus

Contents Theoretical program

The content of the theoretical program of Legal Dentistry and Bioethics course is structured in four thematic blocks, comprising a total of 17 subjects.
