

Información del Plan Docente

Academic Year	2017/18
Faculty / School	110 - Escuela de Ingeniería y Arquitectura
Degree	434 - Bachelor's Degree in Mechanical Engineering
ECTS	6.0
Year	1
Semester	Half-yearly
Subject Type	Basic Education
Module	---

1.General information**1.1.Introduction****1.2.Recommendations to take this course****1.3.Context and importance of this course in the degree****1.4.Activities and key dates****2.Learning goals****2.1.Learning goals****2.2.Importance of learning goals****3.Aims of the course and competences****3.1.Aims of the course****3.2.Competences****4.Assessment (1st and 2nd call)****4.1.Assessment tasks (description of tasks, marking system and assessment criteria)****5.Methodology, learning tasks, syllabus and resources****5.1.Methodological overview**

Subject's learning process to pass the subject is based on the following aspects:

1. Masterclasses where the lecturer will explain the main theoretical concepts as well as will illustrate the application of the theoretical material via exercises and practical cases. Active students' participation is intended in this activity. In parallel, the students should spend self-study time in order to take advantage of the masterclasses.
2. Laboratory sessions will be scheduled during the semester. Lab sessions' assessment will contribute to the single

29701 - Physics I

overall mark. Lab sessions' groups will consist of two or three members.

3. Supervised projects where students will work in problem solving tasks or a practical question proposed by the professor and related with the concepts learned in the subject.
4. Self-study time, learning the subject as well as performing problem solving tasks. This activity is essential for the student's learning process as well as to have success to pass the subject.

5.2.Learning tasks

The course includes 6 ECTS organized according to:

- Lectures (2 ECTS): 50 hours.
- Laboratory sessions (0.4 ECTS): 10 hours.
- Guided assignments (0.32 ECTS): 8 hours.
- Autonomous work (3.08 ECTS): 77 hours.
- Evaluation (0.2 ECTS): 5 hours.
- Tutorials

Lectures: the professor will explain the theoretical contents of the course and solve illustrative applied problems. These problems and exercises can be found in the problem set provided at the beginning of the semester. Lectures run for 3 weekly hours. Although it is not a mandatory activity, regular attendance is highly recommended.

Laboratory sessions: sessions will take place every 2 weeks (5 sessions in total) and last 2.0 hours each. Students will work together in groups actively doing tasks such as practical demonstrations, measurements, calculations, and the use of graphical and analytical methods.

Guided assignments: students will complete assignments, problems and exercises related to concepts seen in laboratory sessions and lectures. They will be submitted at the beginning of every laboratory sessions to be discussed and analyzed. If assignments are submitted later, students will not be able to take the assessment test.

Autonomous work: students are expected to spend about 77 hours to study theory, solve problems, prepare lab sessions, and take exams.

Tutorials: the professor's office hours will be posted on the degree website to assist students with questions and doubts. It is beneficial for the student to come with clear and specific questions.

5.3.Syllabus

MECHANICS

Principles of mechanics

29701 - Physics I

1. Kinematics.
2. Dynamics.
3. Rigid body dynamics.
4. Statics.

Applied mechanics

5. Oscillatory movement.
6. Elasticity.
7. Fluid dynamics.

THERMODYNAMICS

8. Heat and temperature. Heat transfer.
9. Thermodynamics processes. First principle.
10. Thermal machines. Second principle.

5.4.Course planning and calendar

For further details concerning the timetable, classroom and further information regarding this course please refer to the "Escuela de Ingeniería y Arquitectura " website (<https://eina.unizar.es/>)

5.5.Bibliography and recommended resources

[BB: Basic Bibliography / BC: Additional Bibliography]

- [BB] Sears Zemansky. Física universitaria. Volumen 1 / Hugh D. Young, Roger A. Freedman ; con la colaboración de A. Lewis Ford ; traducción Antonio enríquez brito. - 13ª ed. México [etc.] : Pearson, 2013
- [BB] Tipler, Paul A. Física para la ciencia y la tecnología. Vol. 1, Mecánica , oscilaciones y ondas, termodinámica / Paul A. Tipler , Gene Mosca; [coordinador y traductor, José Casas-Vázquez; traductores, Albert Bramon Planas...[et al.]]. - 6ª ed. Barcelona [etc.] : Reverté, 2010
- [BB] Young, Hugh D.. Física universitaria con física moderna. Volumen 2 / Hugh D. Young, Roger A. Freedman ; con la colaboración de A. Lewis Ford ; traducción Javier Enríquez Brito. - 12ª ed. México [etc.] : Pearson, 2009
- [BB] Young, Hugh D.. Física universitaria. Volumen 1 / Hugh D. Young, Roger A. Freedman ; con la colaboración de A. Lewis Ford ; traducción Victoria A. Flores Flores. - 12ª ed. México [etc.] : Pearson, 2009
