

27239 - Environmental Technology

Información del Plan Docente

Academic Year	2018/19
Subject	27239 - Environmental Technology
Faculty / School	100 - Facultad de Ciencias
Degree	452 - Degree in Chemistry
ECTS	5.0
Year	4
Semester	Second semester
Subject Type	Optional
Module	---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The learning method used is based on the cooperative work of the teacher and the student. The method will follow the traditional approach based on lectures but supported by the active participation of the students.

The learning process will be developed in the area of environmental pollution: Water pollution, air pollution and waste.

Activities agenda and teaching documents will be posted in the learning platform moodle (<https://moodle.unizar.es/>)

4.2.Learning tasks

27239 - Environmental Technology

The course includes the following learning tasks:

- Lectures, problems and cases discussion (41 h).
- Laboratory sessions (6 h)
- Special Practice session: Visit to a company (3 h).
- Self study and guided activities (69 h).
- Assessment task (3h).

4.3.Syllabus

The course will address the following topics:

Theoretical lesson

- Topic 1. Water pollution
 - Legislation. Types, origins and effects of pollutants. Water characteristics.
 - Prevention measure.
 - Water treatment. General approach to treatment systems: Water line and sludge line.
 - Preliminary, primary, secondary and tertiary treatments. Sludge treatment: Anaerobic digestion.
- Topic 2. Air pollution
 - Legislation. Types, origins and effects of pollutants. Pollutants classification.
 - Prevention measure.
 - Control technologies.
- Topic 3. Waste
 - Legislation. Characterization and classification of waste.
 - Waste management.

Laboratory work

1. Water treatment.
2. Air treatment.
3. Waste treatment.

4.4.Course planning and calendar

Further information concerning the timetable, classroom, office hours, assessment dates and other details regarding this course, will be provided on the first day of class or please refer to the Facultad de Ciencias web (<https://ciencias.unizar.es/grado-en-quimica-0>).

4.5.Bibliography and recommended resources
