4.1.Methodological overview

The methodology followed in this course is oriented towards the achievement of the learning objectives. Program development and achieving the established learning objectives require continued work of the student throughout the course around the following activities:

- Assistance to class is recommended, and also an active participation in practical sessions
- Reading and study of bibliographical material indicated in each lesson.
- Constant and careful development of the exercises and possible individual case studies throughout the course could propose Professor
- Developing a task and / or group case in which analyze in detail the situation of a company or an industry chosen by consensus between the teacher and students

27521 - Strategic Planning

For making the most of classes, it is recommended that the student carry out a first reading of the bibliographic material of each chapter prior to the explanation in class of the item as well as a more careful reading after the explanation and also in the process of making exercises and tasks.

4.2. Learning tasks

The training activities that are to be developed are intended to stimulate and exercise to students in the field of strategic planning, in order to develop in students the skills described. To achieve this objective the following are proposed as basic teaching resources:

- In the lectures it will be made clear and systematic expositions of fundamental concepts of each topic. The student can prepare and study the contents before class, since it has the relevant literature. In classes these concepts will be discussed and the doubts that have been found will be resolved.
- The practice sessions will be dedicated to solve practical problems or cases in which an active student participation is required. He also proceeds to the exhibition by the students of some of the practical activities.
- Students, integrated teams, will carry out a strategic analysis of a selected company. The work will allow students to use concepts and apply appropriate tool for assessment and strategic decisions of the company tools. Students must notify the teacher in charge, on the date indicated, the composition of the groups. Subsequently, the working groups in consensus with the teacher will select the company on which each group will have to develop the work. Throughout the course, presentations of some parts of the work will be practical sessions.
