1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

In the final year of the degree, it is thought that the capacity to apply the acquired knowledge is more important than the acquisition of new knowledge. The methodology of this course is based on a wide range of teaching and learning tasks such as practical cases, the discussion of ideas and proposals with the rest of the class, lectures, group work, and a final project.

4.2.Learning tasks

The course will includes the following learning tasks:

27653 - Innovation Management

- **Lectures.** The professor explains the basic contents of each topic, justifies their relevance and provides useful tools and concepts to solve practical cases.
- **Practical cases.** They are relatively complex and focused on business situations requiring the student to correctly identify a problem and alternative solutions, assess them opting for one or more of them and then defend the decision in class in front of their peers.
- **Visits.** Visits to institutions related to innovation.
- **Autonomous work.** Readings of articles, book chapters of academic content and official documents that complete the conceptual aspects of each topic presented by the teacher.
- **Tutorials.** Office hours are available to solve doubts.

4.3.Syllabus
