1.General information

1.1.Aims of the course

The course is proposed from a perspective of both theoretical and practical utility oriented to the understanding of the complexity of our world, deepening in the study of the explanatory mechanisms and processes of the development differences in the world map and in the evaluation of cooperation initiatives for international development. It is intended through the integrated knowledge of structures, processes and spatial and temporal changes in the territory to obtain a clear understanding of contemporary issues towards development, to train for the analysis of the diversity of development, the development of proposals for cooperation for development and teamwork.

The main objective of the course is the delimitation and explanation of the spatial inequalities of development. With specific character, it is about reflecting on concepts, indicators and limits of development, analyzing their causes and effects and assessing the interrelations between the different spaces.

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources
