

## 29745 - Vibration and Noise at Machines

### Información del Plan Docente

<b>Academic Year</b>	2018/19
<b>Subject</b>	29745 - Vibration and Noise at Machines
<b>Faculty / School</b>	110 - Escuela de Ingeniería y Arquitectura
<b>Degree</b>	434 - Bachelor's Degree in Mechanical Engineering
<b>ECTS</b>	6.0
<b>Year</b>	4
<b>Semester</b>	First semester
<b>Subject Type</b>	Optional
<b>Module</b>	---

### **1.General information**

#### **1.1.Aims of the course**

#### **1.2.Context and importance of this course in the degree**

#### **1.3.Recommendations to take this course**

### **2.Learning goals**

#### **2.1.Competences**

#### **2.2.Learning goals**

#### **2.3.Importance of learning goals**

### **3.Assessment (1st and 2nd call)**

#### **3.1.Assessment tasks (description of tasks, marking system and assessment criteria)**

### **4.Methodology, learning tasks, syllabus and resources**

#### **4.1.Methodological overview**

The methodology followed in this course is oriented towards achievement of the learning objectives. It is based on participation and the active role of the student favors the development of communication and decision-making skills. A wide range of teaching and learning tasks are implemented, such as lectures, guided assignments, laboratory sessions, autonomous work, and tutorials.

Students are expected to participate actively in the class throughout the semester.

Further information regarding the course will be provided on the first day of class.

## 4.2. Learning tasks

The course includes 6 ECTS organized according to:

- Lectures (1.2 ECTS): 30 hours.
- Laboratory sessions (0.6 ECTS): 15 hours.
- Guided assignments (0.6 ECTS): 15 hours.
- Autonomous work (3.0 ECTS): 90 hours.
- Tutorials.

**Lectures:** the professor will explain the theoretical contents of the course and solve illustrative applied problems. These problems and exercises can be found in the problem set provided at the beginning of the semester. Lectures run for 3 weekly hours. Although it is not a mandatory activity, regular attendance is highly recommended.

**Laboratory sessions:** sessions will take place every 2 weeks (5 sessions in total) and last 3.0 hours each. Students will work together in groups actively doing tasks such as practical demonstrations, measurements, calculations, and the use of graphical and analytical methods.

**Guided assignments:** students will complete assignments, problems and exercises related to concepts seen in laboratory sessions and lectures. They will be submitted at the beginning of every laboratory sessions to be discussed and analyzed. If assignments are submitted later, students will not be able to take the assessment test.

**Autonomous work:** students are expected to spend about 90 hours to study theory, solve problems, prepare lab sessions, and take exams.

**Tutorials:** the professor's office hours will be posted on the degree website to assist students with questions and doubts. It is beneficial for the student to come with clear and specific questions.

## 4.3. Syllabus

### Theoretical sessions

1. Vibration and Noise.
2. Introduction to the theory of vibrations.
3. Vibrations of discrete systems of one and  $n$  degree of freedom. Modal analysis
4. Vibrations in continuous systems: Shafts and beams.

## 29745 - Vibration and Noise at Machines

5. Fundamental concepts of noise.
6. Instrumentation for measurement and analysis of vibration and noise.
7. Sources of vibration and noise on machines.
8. Troubleshooting machines.
9. Noise and vibration control.
10. Practical cases.

### Practical sessions

1. Data acquisition and processing noise and vibration signals..
2. Modal testing of a beam
3. Determination of sound power of a machine and / or equipment
4. Vibration analysis of a cantilevered rotor.
  - Setting up a measurement system
  - Failure frequency Identification
  - Interpretation and discussion of the measures

### 4.4.Course planning and calendar

For further details concerning the timetable, classroom and further information regarding this course please refer to the "Escuela de Ingeniería y Arquitectura " website (<https://eina.unizar.es/>)

### 4.5.Bibliography and recommended resources
