Year: 1

Semester: Second semester

Subject Type: Basic Education

Module: ---

1.General information

1.1.Aims of the course

1.2.Context and importance of this course in the degree

1.3.Recommendations to take this course

2.Learning goals

2.1.Competences

2.2.Learning goals

2.3.Importance of learning goals

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The methodology followed in this course is oriented towards achievement of the learning objectives. The course addresses the analysis of physical activity and sport as social phenomena from:

- Knowledge of different sociological approaches
- The approach to sports facts from the sociological perspective
- The handling and processing of data, documents and other secondary sources
- The obtention and interpretation of primary data
- The formulation of hypotheses, their verification and the elaboration of conclusions and diagnoses
- The application of the results obtained to the different areas in which the students can carry out their profession

This requires a wide range of teaching and learning tasks, such as lectures on the sociological perspective of physical activity and sport, on various sociocultural aspects of sport and on social research methodology applied to sport. Practice sessions and seminars on documentary resources, search and data processing, and research design (research questions, hypotheses, observation methods, research programming, etc.), autonomous work, and guided practical individual and group work.

4.2.Learning tasks

The course includes the following learning tasks:

- Lectures. Sociology of sports and physical activity from main theoretical approaches and social research methodology.
