

30752 - Cultural Landscapes

Syllabus Information

Academic Year: 2019/20

Subject: 30752 - Cultural Landscapes

Faculty / School: 110 -

Degree: 470 - Bachelor's Degree in Architecture Studies

ECTS: 6.0

Year: 5

Semester: Second semester

Subject Type: Optional

Module: ---

1.General information

1.1.Aims of the course

The main aim of this course is to provide the student the tools he or she needs to gain a deep, reflective knowledge of the History and Theory of Spanish Modern Architecture. The course should help him develop a clear, diachronic and sequential understanding of the phenomenon, and show him different paths to approach the analysis and interpreting of the architectural fact, as well as the compositional mechanisms behind it.

1.2.Context and importance of this course in the degree

The course aims at fostering an understanding of the architecture profession and its role in society, through the study of its relationship with the latter throughout History. It also aims at providing the student with tools that help him develop architectural designs grounded on an ample and rigorous knowledge of the basic concepts of the discipline.

1.3.Recommendations to take this course

This is an elective course (6 ECTS) that is part of 'Urban design and Landscape' itinerary. The course is open for 5th year students of the Degree in Architecture and is part of the 'Spring Semester' that offers all the courses in English. This course is mainly recommended for students of Architecture due to its direct relation with the History and Theory of Architecture. It is highly recommended to have taken previous courses in History and Theory of Architecture (Composición Arquitectónica) offered in the Degree of Architecture.

2.Learning goals

2.1.Competences

The skills that the student develops through the Theory and History of Architecture Area as defined in the verification report of the Degree in Architecture Studies of the University of Zaragoza, this course deepens on the following ones: C.E. 107.OP; C.E. 108.OP.

2.2.Learning goals

Result 1. A clear, diachronic, sequential vision of the History of Architecture, as well as a knowledge of the mechanics of architectural composition that integrate architectural design.

Result 2. Synthesizing, through examples, the typological, constructive and morphological features that characterize the periods of the History of Architecture studied in the course: From the Renaissance to the XIX Century.

Result 3. The ability to identify the key works studied, locating them in the period they belong in a reasoned way, justifying their relationship with the history of the place where they have been built.

Result 4. The skill to develop, via the knowledge of the Theory and History of architecture, of an engaged and educated approach to architectural design, providing a critical vision of the works or trends studied in the course.

Result 5. The skill to provide fundaments and convincing commentaries on architectural works, using the knowledge acquired throughout the course as a tool to develop the ability to interpret the most relevant designs of Architecture's History, understanding those as the products of the materials, construction systems and technologies that were used to build them, and a specific cultural moment.

Result 6. The capacity to understand, interpret and analyze academic literature (on the Theory and History of Architecture), as well as the ability to develop structured and suitable contents.

Result 7. The rigorous and measured use of the specific language and terminology of the architectural discipline.

Result 8. The ability to handle specific bibliography.

2.3.Importance of learning goals

This course develops the student's capacities to:

- Position himself in a committed way, grounded on the knowledge of the theory and history of Western architecture, when facing architectural design, thus providing a critical and informed vision.
- Develop architecture projects based on rigorous knowledge of the basic concepts of the discipline.
- Face, within the rigorous knowledge of the theory and history of Western architecture, a research project.

3.Assessment (1st and 2nd call)

3.1.Assessment tasks (description of tasks, marking system and assessment criteria)

The student will be expected to show that he/she has reached the learning results defined for the course through several evaluation activities.

Test #1: Oral presentation of an architectural project. (30%).

Test #2: Written Essay (70%)

4.Methodology, learning tasks, syllabus and resources

4.1.Methodological overview

The methodology followed in this course is oriented towards the achievement of the learning objectives. It is based on an active methodology that favors the development of critical thinking. A wide range of teaching and learning tasks are implemented, such as lectures, practice sessions, autonomous work, and assessment tasks.

Students are expected to participate actively in the class throughout the semester. Further information regarding the course will be provided on the first day of class.

Main methodology:

- M1 Lectures.
- M2 Seminars.
- M3 Studio.
- M10 Office hours.
- M11 Exams.
- M14 Student own work.

4.2.Learning tasks

The course includes 6 ECTS organized according to the following activities:

- Activity 1: Theory lectures (Teaching type T1/ Methodology M1): There will be weekly lectures with their content focusing on the history of architecture, following the course schedule (see course schedule and calendar). The students will be provided with a working guide via the MOODLE platform of the University of Zaragoza. This guide will list the most relevant architecture works of each theory lecture, as well as the general bibliography and the specific bibliography corresponding to each of the sections, as a basic reference for the individual study of the course.
- Activity 2: Studio for the graphic analysis of architecture works (Teaching type T3/ Methodology M3): Throughout the term, the students will develop 3 graphic assignments where they will carry out graphic analyses of architectural works, following the course schedule (see course schedule and calendar). This activity will be carried in small student groups which will additionally be subdivided into work pairs in order to develop their graphic assignments.
- Activity 3: Office hours (Methodology M10-M2): The student will be able to ask for individual interviews with the professors both regarding the contents of studios, seminars, and lectures, in the hours specified in the official calendar. These office hours will also be used to comment on the exhibitions whose attendance has been suggested in the course.

4.3.Syllabus

This course topic is: 'Spanish Architecture in Context'. The course is divided into three sections:

- **SECTION 1:** *Histories of the 'History of Modernity'*
- **SECTION 2:** *(Post) Modernity and its Crisis. The Spanish Scene.*
- **SECTION 3:** *Open debates in the Contemporary Architecture Culture.*

4.4.Course planning and calendar

SECTION 1_*Histories of the 'History of Modernity'*. Session 1 - 5

SECTION 2_*(Post) Modernity and its Crisis. The Spanish Scene.* Session 6 - 10

SECTION 3_*Open debates in the Contemporary Architecture Culture.* Session 11 - 14

After each session (Activity 1), there will be a 2-hour long session dedicated to Activity 2. Partial submission would be scheduled in the first week of the classes.

The course has weekly lectures and studios of 2 hour-long each so that the student will take 4-hour classes per week. The main activities are the following:

- **Activity 1:** Lectures (2h/week) -1 Group
- **Activity 2:** Studio (2h/week) - 2 Groups
- **Activity 3:** Office hours.

All the submissions will be defined the first week of the course and they could be modified under the consensus of all the students and the teachers during the semester.
